

The Complexity Science Research Centre, Technology, OUBS and IKD Research Centre are collaborating to present –

## **MANAGEMENT: STRATEGY, INNOVATION AND CHANGE stream at the Complexity, Science & Society Conference**

**11– 14 September 2005**

This groundbreaking multidisciplinary conference will be hosted by the University of Liverpool. The conference will be an exciting international event offering academic and non-academic participants a unique opportunity to explore the new science of complexity and examine its implications in a broad array of scientific and social fields.

It will cover 20 subjects ranging from Art to Electrical Engineering, Geography to Management and Primary Care to Social Theory.

We are organising an exciting programme of events on *management: strategy, innovation and change*. These will include sessions which provide an opportunity to present and discuss papers, to listen to well known speakers and discuss aspects of complexity, to enjoy participatory workshops and group activities.

We have allocated Tuesday 13th September as our Business and Applications day. We welcome papers that fit into our overall theme from both practitioners and academics.

Deadline for Abstracts now 3rd May. For further information see the conference web site:
